

SYCLO'S AGENTRY:

THE ENTERPRISE-GRADE FRAMEWORK FOR
DEVELOPING, TESTING, DEPLOYING AND
MANAGING YOUR MOBILE APPLICATIONS

WHAT'S NEW FOR 6.0

FASTER, MORE RELIABLE DEVELOPMENT

Agentry 6.0 makes it easier for teams of developers to jointly assemble and configure your mobile applications. The platform's built-in project management and collaboration features ensure quick, reliable deployments and happier development staff.

Refined over a decade of development, Syclo's Agentry is a mobile platform of choice for companies that value quick mobile application development, the ability to deliver stellar user experience and extreme technology flexibility. Agentry 6.0 delivers more of all three, becoming Syclo's most advanced product yet.

GREAT USER EXPERIENCE

Agentry has always set the standard for extreme ease of use and swift application performance. Agentry 6.0's many enhancements take these premises to the next level, giving users a fluent, native device user experience regardless of device type or platform.

IMPROVED DEVELOPER FEATURES

With over 2,000 developers using Agentry to create and configure mobile solutions, developer productivity continues to be the prime focus of our R&D efforts. With Agentry 6.0, Syclo's intuitive Agentry Editor IDE gets multiple enhancements to the Rule Editor wizard, faster import/compare/export processing and improved Team Configuration capabilities.

The result is a high-performance, team-oriented mobile development toolset that's easy to learn and a blast to use!

ANDROID SUPPORT

Syclo applications are now available on Android! Now you can blend the increasingly popular Android handsets with the power of your favorite Syclo solutions.

ENHANCED IOS SUPPORT

We've also enhanced the look and feel of our apps on iPhone and iPad, enabling more of the native iOS controls and design themes.

ENHANCED BLACKBERRY® SUPPORT

Using Syclo apps on BlackBerry? You will enjoy a brand new intuitive user interface, support for barcode scanning and compatibility with more BlackBerry models.

UI IMPROVEMENTS FOR WINDOWS/WINDOWS MOBILE

The Agentry clients for Windows and Windows Mobile have been redesigned for easier navigation, more intuitive handling of complex work and better looks. Now your apps will be even easier to learn and more enjoyable to use every day!
